

Hi!

My name is Julia Byström and I'm fourth year student, studying Cell Biology at master level at Åbo Akademi University. I was an exchange student myself in Aarhus, Denmark last year for one semester, which gave me a lot of great memories :) In my free time I like to cook food spend time with my boyfriend and be outdoors.

I'm looking forward meeting you all and show you around Turku. I hope you have a great time here in Finland! Feel free to contact me if you have any questions :D
