

Greetings!

I am Ester, from Albania, where I have spent the biggest amount of my life, and last autumn I spread my wings and 'begun' my life and studies in Turku. I am on my second year of Master's study in International Law and Human Rights. I say that beginnings are not the easiest, but when you look back it is all worth it. Find something you like to do and pursue that.

For me, what turned Finnish winter into a colorful experience, is my church (with all the amazing activities and of course emotional + spiritual support), nature (amazing river walks, or towards the harbor) and good friends (amazing **food** parties from different cultures and cosines) !

In this small/big world I am happy to get the chance to know you soon! 😊
