

Hi there!

My name is Francisca Uchechukwu Onuoka, and I'm from Anambra State, Nigeria. I'm currently pursuing my Master's in Sustainable Chemical and Process Engineering at Åbo Akademi University.

Studying in Finland has been a wonderful journey so far — from the peaceful snowy nights in Turku to the lively summer days, every season brings something special. As your tutor, I'm here to help make your transition smoother and give you a warm welcome into our student community.

Outside academics, I enjoy exploring the city, trying new recipes, and binge-watching good TV shows. I'm also someone who appreciates meaningful conversations and making new friends.

If you ever have questions or just want to talk, feel free to reach out. I'm always happy to help and excited to meet all of you!

Feel free to always Contact me at: francisca.onuoka@abo.fi

Welcome, and best of luck with your studies!
