

# Kaniz Fatema Begum

International master's degree tutor

Hey good people,  
I am Kaniz, currently doing my Master's in Information Technology: Computer Engineering at Åbo Akademi University. Things I love about Finland include the education system, nature, the honesty and respect for others' privacy, the thoughtful design and maintenance of everything, the summer nights, and, of course, cinnamon buns.

I'm in love with Turku because it offers a great balance between city life and nature. You get all the conveniences of a city, and with just a 20-minute bus ride, you can be in the woods. The old aesthetic buildings and the Aura River are also among the best things about Turku. Things I don't like are the short, gloomy days of winter, loud motorbikes, and the scarcity of jobs.

I'm an ambivert and an empathetic person. I admire nature, have a soft corner for animals, and love exploring new things. My hobbies include doodling, roaming around the city, and watching web series.

I wish all the very best to the new students and look forward to meeting you!
