

*Hi everyone, and a warm
Welcome to you all*

I'm Saeedeh, one of the tutors supporting you this semester.

I'm originally from Iran, and currently living in Turku, where I'm studying for my Master's in sustainable chemical and process engineering at Åbo Akademi.

As you begin this exciting chapter, I'll help you get settled, answer your questions, and make sure you don't feel alone navigating this new environment.

When I'm not studying, you'll probably find me out with friends, enjoying a good coffee, lost in music, or binge-watching my favorite series.

Can't wait to meet you all. Feel free to reach out anytime, even if it's just to say hi!
