

Hi everyone! I'm Ambreen, your international student tutor for the Master's Programme in Governance of Digitalization here at Åbo Akademi University in Turku.

Originally from Pakistan, I moved to Turku in 2024 to pursue my academic journey in Finland. This transition has been both exciting and full of learning, and I'm happy to support you in making yours as smooth as possible.

At Åbo Akademi, I'm diving into subjects like data analytics, information systems, and digital governance, especially focusing on how technology, trust, and policy intersect in society.

In addition to my studies, I'm actively involved in university activities, mentorship programs, job shadowing opportunities, and research groups related to AI transparency, FinTech, and digital innovation. Outside the classroom, I enjoy exploring Turku's parks, libraries, farms and local culture, and trying out new food.

As a tutor, I'm here to support your academic and practical transition, whether it's navigating campus life, understanding course structures, or settling into Finnish society. Feel free to reach out. I'm always happy to help!

Looking forward to meeting you all,

Ambreen 🌿
