

Welcome to IMATEC at Åbo Akademi University!

Your Master's Tutors 2026

- Philip Ighile

Hello everyone,

My name is Philip Ighile, and I am one of the master's tutors for the International Master in Technology and Management for Circular Economy (IMATEC) programme at Åbo Akademi University.

First of all, congratulations on your admission and welcome to Åbo/Turku and ÅAU! Starting a new master's programme in a new country can feel both exciting and overwhelming, especially for international students. As your tutor, I will be here to help make your transition smoother and more enjoyable.

I am currently studying here at Abo Akademi University, and I understand many of the questions and challenges that new students may face from academics and student life to living in Finland and adapting to a new environment. My role is to support you during the orientation period and throughout the semester whenever possible.

Feel free to ask questions about:

- Studies and courses
- Student life at ÅAU
- Living in Turku/Åbo

- Transportation and daily life
- Tips for settling into Finland
- Campus activities and meeting new people

I hope your time here will be rewarding both academically and personally. Be open to new experiences, make connections, and enjoy the journey ahead.

I look forward to meeting all of you soon and helping you get started at Åbo Akademi University.

Welcome once again to IMATEC and safe travels to Finland!
