

TUTOR GREETING!!
MSC IN
SUSTAINABLE
CHEMICAL AND
PROCESS
ENGINEERING

Welcome to the master's program in sustainable chemical and process engineering
dear new students, we welcome you to Abo Akademi University and to the master's program.

Dear Students,

As your student tutor we are very excited to welcome you guys as you begin your educational journey. Starting a masters programme can be quite overwhelming especially for international students. Our responsibility as your student tutor is to help you get started with your studies, find your way around the university and Turku, meeting other students and help you become part of the student community

Abo Akademi university offers a welcoming and supportive environment, and the city is also wonderful especially for students. The master's degree programme in sustainable chemical and process engineering is a place to learn, explore and build skills needed in future. In this program you will get to meet quite a lot of people from diverse country or continent. This program encourages teamwork and problem-solving skills which is one of the qualities of an engineer.

Hi, my name is Winifred Okonkwo, and I am excited to be your student tutor. Studying in Abo Akademi has been such a great journey for me, I enjoy the exciting course, supportive lecturers and the opportunity to grow both personally and academically. In general, the study environment allows one to ask questions, share ideas and also learn from one another. Starting something new can be very exciting and overwhelming too, but as your tutor I am here to guide, support and help you settle in. if you have any question feel free to ask me.

Hi, I'm Dilini Wathsala from Sri Lanka. Learning at Abo has given me the opportunity to learn many new things, both academically and personally. Living and studying in Finland is really interesting with exciting weathers. I would be happy to help you in moving to Finland, sharing my own experiences. Don't be afraid. For sure, you will adapt to the new surrounding more comfortably than you expect. Feel free to contact me.

A Few Tips From Us

Attend orientation activities, because they will help you understand the university better.

Ask questions whenever you are unsure. It is better to ask than to stay confused.

Get to know your classmates. They can become your friends, study partners, and support system.

Explore the campus and study spaces early, so you feel more confident when classes begin.

Be patient with yourself. Starting something new takes time.

Final Message

We are **excited** to meet you and support you as you begin your studies.

Looking forward to meeting you
