

Tutor Greeting - Talha Ahmad

Hi, and welcome to the Master's Programme in Biomedical Imaging!

I'm Talha, one of your tutors. I have been a tutor before, so I know exactly how the first weeks feel: new, a little overwhelming, and genuinely exciting. Helping you settle in is the whole point of my being here.

What I love about this programme is that you actually get your hands on the tools. From microscopy and super-resolution imaging to PET and digital image analysis, you learn it by doing it, surrounded by people who find this stuff as fascinating as you do.

You'll spend a lot of your first weeks around BioCity and the Turku BioImaging labs, so come find us there and ask us anything, even the awkward questions. Those are usually the best ones.

See you in Turku,
Talha
